

MPCS-3

The **MPCS-3** is a microplate processing conveyor system able to integrate up to three processing functions on a single conveyor. This system is designed to meet the needs of research and development departments or small-scale manufacturers.

The MPC3-3 offers:

- Processing speeds between 300 and 1000 plates per hour depending on configuration
- Stack feeding and restacking (stacks have 25 to 30 plate capacity)
- Modular design for easy system upgrades
- Three available working stations, which can be used to install your choice of:
 - Precision coating with better than 1% CV
 - Single station combination wash/aspirate function (for multiple washes at one station)
 - Wash only
 - Aspirate only
 - Drying

Other functions and higher speeds are available on our larger systems.

OBPW designs and manufactures a wide variety of systems. We specialize in custom design of integrated systems to automate production processes. Since 1979, OBPW has been successfully solving problems and supplying reliable and cost-effective equipment to the diagnostic industry. We are confident that our experience will enable us to meet your requirements.
